

Millennium™ Series Poly Seating

Premium Quality Classroom Furniture™

Aesthetics:

Long forgotten in our industry. Take a good look at the clean basic lines of our furniture compared to your other possibilities.

Functional / Versatile:

All our furniture comes in graduating heights, with different book storage capabilities, with your choice of colors to fit perfectly into your classroom environment.

Exclusive Posi-lock™ Stacking System:

Stacking System: When stacked, chairs lock together for safety when being moved. Stacks 12-high and rolls through a standard doorway when 2508D dolly is used.

Contemporary Design:

Specifically designed for today's classroom. Welcome to the new Millennium.

Three Shell Sizes / Five Seat heights.

Shell:

One-piece, high-impact, blush-resistant polypropylene shell.

Ten Standard Shell Colors:

Blue, Beige, Grey, Teal, Burgundy, Black Primary Blue, Primary Red, Primary Yellow, Primary Green. Special colors available in quantity.

Colors Match:

Capitol colors match throughout product lines.

Sculpted Seat Design:

'Bubble' in seat forms ergonomically correct contours and aligns student for proper posture-- the seat places the student in the proper task position.

Circulation:

Deep 'waterfall' front edge promotes good blood circulation to the legs.

Heavy Duty Legs:

1-1/8", 16 gauge legs.

Desk Top Storage:

Chair can be safely stored on desk or table top during floor cleaning. How handy is that?!

Warranty:

- Lifetime frame structure warranty
 - Eight year thermoset plastic warranty
 - Two year finish/wearing parts warranty
- Deep-ferrule, inside-attaching swivel glides (nylon or steel).

Wide-Back Design:

Posture correct wide back. Back flexes for comfort. **Never buy a poly chair that uses a tubular back support – it removes all flexibility and comfort. A well designed poly-chair will never need any additional back support.**

Stimples: Textured shell to provided non-slip surface and assist in maintaining like new appearance.

Venting: The arch shaped hole in the seat back is designed for proper ventilation, to release pressure in lower back. The vent is also flanged to add strength to shell body.

Ribbing: Extended ribs to cover seat brackets

Attachments: Precision fit, nickle plated, steel rivets attach shell to frame. No exposed rivets on seating surface.

Seat Brackets: Heavy-Duty 13-gauge seat brackets. Large seat brackets place frame legs in a more vertical position, increasing the chair's load capacity and extending the life of the frame.

Statics: The weight of the occupant is transferred directly to the legs of the frame. The shell rests directly on the legs, not the rivets or the attachment brackets. Therefore the attachments never bear any load.

Full Nickel-Chrome Frame:

Chrome is comprised of metal layers (Nickel & Chromium) electrostatically bonded to metal. Nicke is what give Chrome its ability to resist scratching. Our standard Nickel thickness is 4-6 mills thick which is 25%-50% thicker than our competitors. We Chrome with plateable quality steel tubing after all welding is completed to prevent rusting on unfinished welds.

Completely Assembled:

Unit is shipped completely assembled. 100% inspected and cleaned. Shipped as you specified, delivering the most consistent quality in the business.

Uniform Swedge:

Controlled swedge allows proper glide fit and allows the spring steel ubrella to work at maximum hold-tension.

Glides:

Nylon or steel, your choice. Swivel design, case hardened steel, super silent deep ferrule. All glides make full level contact with floor. Designed so the maximum swivel angle of the glide is not violated.
